

## Cleaning machine

The Vibam is a universal machine well suited for pre- and fine cleaning many different species of grain and heavy seeds.

The standard design of the machine is provided with both pre- and aftersuction units.

Quick screen changing from precleaning into fine cleaning by the operator serves to optimize the cleaning tasks.

The Vibam is a very competitive machine, both as regards price and capacity as well as function and operation.

The technology of the machine is thoroughly tested, which can be documented by many references all over the world.

- Easy and quick operation and screen changing.
- The screen boxes are made of wear resistant Wisiform plywood, which is approved for food.
- Screen cleaning with special rubber balls.
- Built-in light.
- Durable surface of the machine owing to high-quality powder lacquering.
